

~~ABSTRACT~~

*ABSTRACT OF THE DISCLOSURE*  
~~GRAPHIC IMAGE TEXTURE GENERATION~~

5 An apparatus ~~(34)~~ for texture mapping in a computer graphics system, using a predetermined set of ~~standardised~~ *standardized* textures. Each texture of the ~~standardised~~ *standardized* set is a procedural texture, and is supplied to the apparatus ~~(34)~~ as one or a sequence of program commands ~~(44)~~ the execution of which will result in the generation of the respective procedural texture. In a preferred embodiment, the means for processing the program commands ~~(4)~~ comprises a processor operable to implement only those input program commands or sequences of input ~~programme~~ *program* commands as are required to generate the procedural textures of the ~~standardised~~ *standardized* set.
